

The background features abstract, overlapping green geometric shapes, primarily triangles and polygons, in various shades of green, creating a modern and dynamic visual effect.

Well-Informed IQP Teams

Gordon Library

2015

Library Resources

Check your ID2050 course site for
“Library Assignments”

You will find:

- ▶ Your site librarian and contact information
- ▶ [The IQP Research Guide](#)

We're here to help

Clarify your Information Needs

- ▶ A Literature review describes, summarizes, evaluates, clarifies and integrates information on your project topic
- ▶ A background chapter reports on your sponsor, your location, past projects, etc.
- ▶ A project proposal requires methods.

Great IQPs typically cite:

- ▶ Peer-reviewed, scholarly articles
- ▶ Governmental websites and reports
- ▶ Organizational websites and reports
- ▶ Books

Have a Plan

- ▶ Determine how your team will organize information
- ▶ Consider all your questions:
 - ▶ Fact based
 - ▶ Idea based
- ▶ Take each question separately and consider:
 - ▶ Who cares about this information?
 - ▶ Where would those who care share this information?
 - ▶ What keywords and jargon would they use?
 - ▶ What databases have the information **type** that you need?

Organizing Knowledge:

- ▶ Citation Managers (Endnote, RefWorks, EasyBib, Flow, Etc.)
- ▶ Citation Formats (IQPs use APA)
- ▶ Collaborative Spaces

Endnote: Why use it?

1. Gather your group's information in one place
2. Organize your information
3. Insert in-text citations automatically
4. Format citations into APA format automatically

Endnote Lessons Learned

- ▶ You need to take the time to set up Endnote. It takes at least one hour - not kidding.
- ▶ Your whole team needs to commit to using it in order to have a positive experience.
- ▶ Be willing to do some troubleshooting. Ask the Research and Instruction team, or call endnote help directly - their phone help is outstanding.
- ▶ MAC USERS: Use the pdf linked on the IQP research guide, under the Endnote Tab. It works!

Other Citing Tips

- ▶ Use the citing features in:
 - ▶ [Summon](#)
 - ▶ [Google Scholar](#)
 - ▶ [Other research databases](#)

If you can't find an easy way to copy and paste a citation, use the [Purdue Online Writing Lab \(OWL\)](#)

- ▶ Many of your sources will not have a personal author. Rather, they will have a corporate author. For example, WPI can be a corporate author. For entry in Endnote, add a comma after the phrase name, as in:
 - ▶ Worcester Polytechnic Institute,

Not all information can be found in one place.

- ▶ As a rule of thumb, **use at least three search tools** to look for information in any given search.
- ▶ Example: Looking for peer-reviewed literature?
 - ▶ [Summon](#)
 - ▶ [Google Scholar](#)
 - ▶ [Subject Specific Databases](#)

Get the most out of Google

- ▶ Use site search features to focus on one domain type (e.g. .edu, .gov, .org, .au).
 - ▶ Examples:
 - ▶ Education policy site:.gov
 - ▶ “Science museum” site:.th
- ▶ Look for associations and organizations by adding the word “Association” to your searches.
- ▶ Go to the second page of results - most people don't!

Keywords

- ▶ Yes, think of synonyms, acronyms, and phrases.
- ▶ But also.....have patience.
 - ▶ Every discipline has its own vocabulary.
 - ▶ Keywords differ by publication type. i.e. Researchers will use technical terms, but journalists will use popular terms.
 - ▶ Finding the right search terms can take 10 or 20 searches in multiple places, even for the best researchers out there!
 - ▶ Ask your advisors, your professors, your sponsors, and your librarian for ideas.

Your Job

- ▶ Continue searching for information sources.
- ▶ Find information that would be of value to your sponsor, your advisor, any other stakeholders
- ▶ Make an appointment with your librarian and bring your list of top 8 sources to review. These should be in APA format or in a citation management account.
