How to Attribute OER in Your Canvas Course

“How to Attribute OER in Your Canvas Course” by Anna Newman for Worcester Polytechnic Institute is licensed under a Creative Commons Attribution 4.0 International License.
Why Is Attribution Important?

OER are **openly licensed**, which means that anyone can copy, share, and adapt OER as long as they follow the terms of the license, which usually includes attribution.

Attribution statements **give credit** to the author and **let others know how they can use the resource** by including the open license information.
"Photosynthesis" by Khan Academy is licensed under a Creative Commons Attribution-Noncommercial-ShareAlike 3.0 International License.

“Photosynthesis” is the TITLE of the resource, and it links to the SOURCE. “Khan Academy” is the AUTHOR of the resource. The resource has a Creative Commons LICENSE, with a link to more details about the license terms.
If you’re embedding an OER in your course site:

Include the attribution statement with the resource.

"Photosynthesis" by Khan Academy is licensed under a Creative Commons Attribution-Noncommercial-ShareAlike 3.0 International License.
If you’re using an OER that you’ve adapted:

Add to your attribution statement a description of how you’ve changed the OER.

"Where Is Light Energy?" by OpenStax College is copyrighted August 24, 2018 by OpenStax College and licensed under a Creative Commons Attribution 4.0 International License. / This item has been modified by removing a figure.
If you’re using content from multiple OER:

Make an “Attributions” section at the bottom of your page OR create an “Attributions” page in your module.

Attributions

“Photosynthesis” by [Khan Academy](https://www.khanacademy.org) is licensed under a [Creative Commons Attribution-Noncommercial-ShareAlike 3.0 International License](https://creativecommons.org/licenses/by-nc-sa/3.0/).

“Where Is Light Energy?” by [OpenStax College](https://openstax.org) is copyrighted August 24, 2018 by OpenStax College and licensed under a [Creative Commons Attribution 4.0 International License](https://creativecommons.org/licenses/by/4.0/).
Tips & Tricks

Enter the resource title, author, and license into WA SBCTC’s Open Attribution Builder to automatically build an attribution statement.

Refer to guidance from Creative Commons on good (and bad) attribution statements: Best Practices for Attribution.

Find examples of creating attribution statements for OER content that you have adapted in this OpenOregon blog post: Attribution Statements for Remixed OER Content.
